EDUCATION

M.Tech Dual Degree (Artificial Intelligence and Data Science)

School of Data Science and Forecasting, DAVV
CGPA - 9.3

2021 – 2026
Indore

12th

St. John Higher Secondary School
Percentage - 96%

2020 – 2021
Rau

PROFESSIONAL EXPERIENCE

AI Engineer Intern

DICE Enterprises Pvt Ltd

12/2025 – 04/2026
Pune

- Built ReviveDesk, a multi-agent AI system using Gemini 2.5 Flash, FastAPI, Supabase pgvector, and RAG to revive stalled B2B sales opportunities.
- Designed AI agents for research, root-cause analysis, sentiment tracking, objection detection, and revival strategy generation from CRM and meeting data.
- Developed a deal scoring engine using engagement history, objection severity, sentiment trends, and company momentum to prioritize high-value recovery opportunities.
- Automated CRM documentation and meeting intelligence workflows, reducing manual admin time from 20 mins to 2 mins and improving CRM completeness from 62% to 97%.

Data Analyst Intern

Sparsh Magic LLP

07/2023 – 08/2023
Indore

- Automated data workflows and reporting using Google Apps Script, reducing manual effort.
- Designed and developed interactive dashboards in Power BI & Looker Studio to track KPIs.
- Conducted data cleaning and transformation using Pandas.
- Delivered data-driven insights to leadership, supporting business decisions that improved operational efficiency.

PROJECTS

VoiceScreenAI

- Engineered an **AI-driven interview screening platform** leveraging LLMs to autonomously conduct and evaluate technical and behavioral interviews.
- Architected **multi-agent workflows** using LangGraph to orchestrate question generation, response analysis and interview flow.
- Built RESTful APIs with **FastAPI** and **Supabase (PostgreSQL)** to manage interview sessions, scoring and persistent state.
- Implemented **adaptive, role-aware scoring** with relevance and fraud detection, producing automated and explainable hiring recommendations.

Medical AI Assistant

- Developed a medical chatbot using **LangChain**, **Pinecone**, and Google Generative AI embeddings with **RAG** architecture.
- Built **FastAPI** backend with modular APIs for PDF ingestion, query handling, and context-aware responses.
- Integrated Groq's **LLaMA-3-70B-8192** for accurate medical insights with reduced hallucinations.
- Implemented PDF parsing, embedding generation, and vector search for precise information retrieval.

News summarizer and text-to-speech convertor

- Developed a full-stack Python application that extracts and summarizes real-time news articles.
- Integrated Groq Llama to generate context-aware summaries tailored to user-input keywords.
- Implemented multilingual support by translating English summaries to Hindi using translation APIs.
- Converted translated summaries into speech using gTTS, enabling audio playback for user engagement.
- Performed sentiment analysis and comparative insights across multiple articles to highlight tone.

SKILLS

- Programming Languages - C,C++,Python
- ML/DL - PyTorch, TensorFlow, scikit-learn, Transformers (Hugging Face),NLP
- GenAI / LLM - Langchain,LangGraph,Hugging Face, RAG,FastAPI
- Databases and Cloud - MySQL,MongoDB,Azure,GCP
- Data Visualisation - PowerBI,Tableau,Looker Studio,Matplotlib,Seaborn
- Version Control - Git/Github

CERTIFICATES

- SQL for Data Science
- Python for Data Science
- Foundations: Data, Data, Everywhere

ACHIEVEMENTS

- Qualified **GATE 2025 (Data Science and Artificial Intelligence)** with **AIR 3219**.
- Google Cloud Carrier Practitioner Program
- Google Cloud Study Jams 2023
